

NKE bearings for industrial gearboxes

Versatile solutions for demanding applications

More possibilities!

Your competent partner for bearings

> Standard and special solutions

Suitable bearings for your drive system

Loads, speeds, torque, installation space... - there are many factors you have to consider when designing a drive system. Suitable bearings play a decisive role in industrial gearboxes.

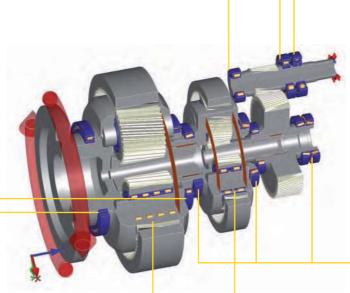

Creative technical and commercial solutions, combined with good stock availability as well as short delivery times are the NKE benefits for you.

Application example: Bearing arrangement of a planetary gearbox

Cylindrical roller bearings

- Suitable for high radial loads and medium to high speeds
- > In floating arrangements

- Radially unrestrained to accommodate thrust loads
- > Limited radial loads, provided that:

Full complement cylindrical roller bearings (without cage)

- Suitable for very high radial loads
- > Low speed

Special cylindrical roller bearings

- > Modular system allows for standardisation of planet wheel bearings
- > 2-, 3- or 4-fold sets as required

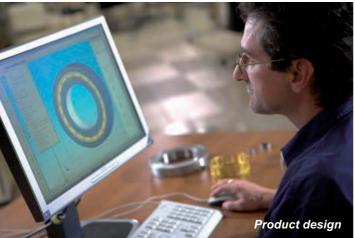

Tapered roller bearings

- > Suitable for high radial loads
- When paired, can take up thrust loads in both directions Richtungen
- > Custom designs possible

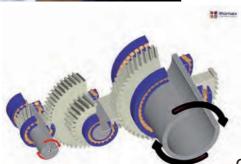

^{*} For smaller gearboxes NKE deep groove ball bearings and angular contact ball bearings are also used.

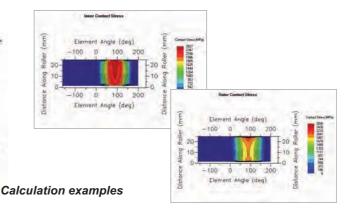

> Professional service support

Equipped with experience and know-how, our technical and commercial teams work closely together with our customers. Our services include:

- > Application consultancy
- > Technical calculation
- > Certification support
- > Product development, design support
- > Training

Applications in various industries

Other NKE bearing applications include:

- > Plant construction
- > Materials handling
- > Railway vehicles
- > Metal production and processing
- > Wind energy
- > Mining and heavy machinery

Geared hub motor

NKE headquarters in Steyr – more than 10.000 m² for core functions such as engineering, production, logistics, quality assurance, marketing and sales

NKE AUSTRIA

NKE AUSTRIA GmbH is a premium bearing manufacturer with headquarters in Steyr, Austria. The company was founded in 1996 by a group of senior staff members of the former Steyr Wälzlager.

NKE manufactures both standard and special bearings for all industrial applications. Our core competences – engineering, product development, final processing of components, assembly, quality assurance, logistics, sales and marketing – are centralised in Steyr. The site is accredited with ISO 9001:2008 (design, development, manufacturing and distribution of bearings), ISO 14001:2004 and OHSAS 18001.
